GROOVESTREET DESIGN

Digitizing Your Business

Company Profile

Version 1.1 · October 2026 · Kampala, Uganda · Serving East Africa and worldwide

Our promise: Premium design and build at rates that fit a growing business. Fixed quotes written in UGX. Launch dates written in stone.

1. Who We Are

GROOVESTREET DESIGN is a design and build studio in Kampala, Uganda. We design and build premium websites, brands and graphics for growing businesses across East Africa and beyond.
We do not do "pretty pages." Every build is engineered to bring calls and messages to your business — then proven on real devices before it reaches you.
Our promise:

> **Premium design and build that earns your customer's attention. We stand behind every build, from the first sketch to the day it goes live.**

We are a focused team that uses AI as a tool, not a replacement for craft. That combination lets us move faster, keep costs down, and deliver a level of polish a traditional agency structure would struggle to match.

2. Why Clients Choose Us

- A focused team that uses AI as a tool, not a replacement for craft — senior craft, machine speed.
- Every project passes a 60-point checklist before launch — covering links, forms, phone numbers, WhatsApp buttons, accessibility (WCAG 2.2 AA), performance budgets, and real-device testing.
- Performance is a design decision — a hard budget your build cannot miss.
- WCAG 2.2 AA accessibility — non-negotiable on every build.
- Post-launch support — 30 days included on every build.
- Proof over claims — 30+ websites, 200+ designs, 50+ clients, and 90% 5-star rated.

3. Services & Pricing

Landing Page	**One page, one offer, one clear next step**	**200,000 UGX**	**3–5 days**
Custom Website	5–10 pages, contact form, basic SEO.	**500,000 UGX**	2–3 weeks
Signature / E-commerce	Custom design, CMS, online store with payments.	**1,800,000 UGX**	3–6 weeks
Graphic Design	Logos, flyers, posters, social graphics.	**20,000 UGX**	48 hours
SEO Optimization	Get found on Google, Maps and search.	**100,000 / month**	Per month

4. How We Work

Discovery — You tell us about your business, goals, and audience.
Quote — We give you a fixed UGX quote with a written timeline.
Design — We present the visual direction; three revision rounds included.
Build — We build and test on real devices (Android and iPhone).
Launch — You go live, take full ownership, and get two weeks free support.

5. Quality & Trust

Every project passes a 60-point checklist before launch — covering links, forms, phone numbers, WhatsApp buttons, accessibility (WCAG 2.2 AA), performance budgets, and real-device testing. What clients see is what they get: no broken links, no unanswered forms, no surprises.
Performance is a design decision. A fast website keeps visitors, and a fast build shows respect for their time.

- LCP ≤ 2.0s on mobile 4G — the build feels instant.
- CLS ≤ 0.05 — the layout stays stable, nothing jumps around.
- INP ≤ 200ms — buttons and menus respond instantly.
- First-visit JavaScript ≤ 140KB gzipped — pages load quickly even on slow connections.

6. Proof — What Clients Say

“ They built my restaurant website in two weeks. I get booking calls every day now. Best money I've spent on my business. ”

“ Professional, fast, and the WhatsApp bot saves me hours every day. My customers love it. ”

“ Fixed price, clear timeline, and they delivered exactly what they said. No stress at all. ”

“ My flyer looks like it came out of a print catalogue — but it took 48 hours, not two weeks. ”

“ Finally an agency that explains what they are doing. And the result speaks for itself. ”

“ The Google Maps listing alone brought me more customers than my old web designer did in two years. ”

Sarah Nakato, Owner, Kampala Restaurant · Michael Okello, Founder, Okello Designs · Emily Ashaba, Director, Ashaba Academy · David Ssemwanga, Manager, Ssemwanga Motors · Grace Mukasa, Marketing, Mukasa Events · Peter Kigozi, Owner, Kigozi Pharmacy

Stats: 30+ websites · 200+ designs · 50+ clients · 90% 5-star rated · Live sample: hotel-groovestreet-live.netlify.app

7. Who We Serve

Growing businesses across East Africa — startups, SMEs, and established brands — that need a digital presence that brings calls and messages, not just a pretty page. Worldwide, from East Africa.

8. The Team

A focused, human-led studio. When you work with GROOVESTREET, you work directly with the people who build your site.

Founder & Project Lead — owns the client relationship from first conversation to handover.

Design Lead — directs visual direction, brand identity, and revision feedback.

Development Lead — builds and tests every site against the performance and accessibility budget.

Production & AI — handles deployment, post-launch support, and the AI-assisted tooling that keeps delivery fast.

Member bios and photos are on the website's About page.

9. Brand

Colors — Brand Green #1B4D3E (primary), Accent Orange #FF5A1F (accent), Paper #F6F4EF (background), Ink #0E1113 (body).

Voice — Plain, second-person, outcome-led. We use "you" more than "we." Hero and CTA copy stays within ~20 words. Banned words: solutions, synergy, leverage, elevate, unleash, game-changer, world-class, cutting-edge.

Type — Sentient for display, Inter for body and UI — self-hosted, no external requests.

10. Get Started

1. Tell us about your project — email groovestreetsoftware@gmail.com, call or WhatsApp +256 774 778 164, or visit us in Kampala.
2. We reply within 24 hours with a fixed quote and a written timeline.
3. We build, test, and launch on your approved timeline.
